

Classic

Features and Benefits - Spot the Difference to be used in conjunction with cases

	Feature	Benefit
1 	Over one million Classic conservatory roofs installed to date	Tried, tested and trusted. The ultimate in peace of mind as you know the roofs are performing day in day out in all that the UK climate can throw at it
2 	The first conservatory roof to be BBA approved	In 1996 we were the first to submit roofs for independent 3rd party accreditation - confidence that the roof is fit for purpose (and this includes roofs from our downstream fabricators too) - don't just take our word for it
3 	Tried, tested, trusted for nearly 25 years	Ultraframe has been designing and manufacturing roofs for nearly 25 years - exacting standards backed with pure expertise...your perfect partner
4 	Installers and fitters regard Classic as the most versatile and configurable system on the market	Your sales team have the confidence that whatever design/style/shape they sell Classic can accommodate it
5 	Unique ridge ventilation as standard	Helps the homeowner to control internal air movement and internal temperatures
6 	Eavesbeam ventilation is optional	Combine ridge trickle ventilation with Eavesflow and you have the perfect combination of cross flow and convection working in tandem - effective minimisation of condensation
7 	Classic ridgeflow, unique, warm air extraction system	Thermostatically controlled so it works when the consumer is out
8 	PVCu twinwall glazing bar top cappings, (choice of two styles Dome or Bevel)	Excellent thermal performance makes the conservatory warmer in winter, and design options for more choice
9 	The most thermally efficient 'traditional' roof on the market	No other 'traditional' roof comes close - -4 deg C (40%) warmer than competitors pvc or aluminium top caps

Classic

Features and Benefits - Spot the Difference

	Feature	Benefit
10 	Speedy glazing bar attachment at the ridge with speedloks	Proven technique using space age materials - speedy attachment on site
11 	Revolutionary effective Tie Bar Replacement Kit	Remove unsightly tie bars with confidence - your consumers will appreciate it
12 	Reliable Classic gable frame support system	Eliminate frame wobble, particularly under double doors and remove the need for extra soak aways - saves money on site and looks good. Use on gable fronted and lean-to's
13 	Superior internal decorative eaves cladding, with 21 styles of Ultraselect for consumers to choose from	Wide choice of finishes (21) plus foils - allows the consumer to tailor the conservatory to match their internal colour scheme
14 	Conservafash - Unique lead free flashing kit	Further speed up installation with the combined soaker and stepped PVC flashing - save time and money over lead
15 	Engineered structurally proven jack rafter connecting kits	Whether it's wind uplift or heavy snow load, the connection point is strong and waterproof
16 	Classic offers the widest selection of finials and crestings	With Classic, you are not stuck with one choice - make your conservatory stand out from the crowd (Easyclean versions also)
17 	Fully insulated boxgutters to suit all possible applications	In-line with Classic being the most thermally efficient roof, this continues with the box gutter - reduces the chance of condensation
18 	Extensive choice of optional glazing materials	From high performance Poly to Conservaglass, there are options for all budgets which means that homeowners with varying budgets can access our technology
